

RABOBANK

CASE STUDY

Rabobank is a Dutch multinational banking and financial services company headquartered in Utrecht, Netherlands.

They are a global leader in food and agriculture financing and sustainability-oriented banking.

Facts about the project:

Industry - Banking

Products Used - EVComplete and Office 365 Onboarding Complete

Archive Size - 200+ TB

Number of Users - 70,000 Users (49k active users / 20k leavers)

“It was the flexibility of the solution that delivered such exceptional value, coupled with the scale of what we were able to achieve with limited project resources.”, Jacob Kraft, Rabobank

Empowering Digital Transformation

With cloud platforms handling a majority of infrastructure needs, a growing focus is managing the movement of business data throughout the enterprise lifecycle.

This includes everything from cloud onboarding, compliance migrations, or expiring legacy data, to restructuring events like mergers and acquisitions.

Cloudficient orchestrates these transitions, handling complex enterprise transformation scenarios as a business process, end to end with cloud native technology.

Performing a data migration is more than just copying the data. There are many additional tasks that need to be performed, tracked, audited and reported on.

Read more about it in this [article](#) and see how our cloud native platform scales to perform these operations.

EMPOWERING DIGITAL TRANSFORMATION

Background

Rabobank is a Dutch multinational banking and financial services company headquartered in Utrecht, Netherlands

After 10+ years, Rabobank was struggling with an aging Enterprise Vault environment reaching its limitations and need to know how to get to Office 36

Challenges

EV encompassed nine different environments spread over five continents

Largest EV deployment in Europe

EV archived data comprised of not only current staff but also former employees who had long left the business

200+ TB to migrate

More than ~70,000 users
(~49k active users / ~20k leavers)

cloudficient
EMPOWERING DIGITAL TRANSFORMATION

Always do a Proof of Concept! Always!

Cloudficient solutions are 100% cloud-based, drastically reducing required on-premise components, with the ability to spin up a dedicated tenant in minutes.

We advise you to Always do a Proof of Concept. Click on the video above.

Confirming 100% compatibility for our customers is a key part of our unique approach to removing all project risk.

The Solution

Cloudficient's EVComplete & Onboarding 365 Complete solution provided a seamless Office 365 onboarding process for Rabobank's users

Key migration steps, such as user communication, licensing, mailbox & archive data synchronization and de-provisioning of EV access, were completely automated

While the entire project took 12 months the actual data migration was approximately 6 months

Built on the latest cloud native technology, the ReMAD Platform powers Cloudficient solutions to meet the needs of the largest enterprise organizations – acting as a command center for orchestrating complex transitions across multi-regional environments.

“Considering, by the end, we had moved data relating to some forty-thousand users, the scope of what we achieved really says something about us as a small team, and about the choice of technology we made early on. When we learned about Cloudficient's EV retirement and Office 365 onboarding service, we believed we'd found the best partner able to perform a migration like this at scale.”, Martin Tapak, Rabobank

With unmatched next generation migration technology, Cloudficient is revolutionizing the way businesses retire legacy systems and transform their organization into the cloud. Our business constantly remains focused on client needs and creating product offerings that match them.

We provide affordable services that are scalable, fast and seamless.
