Top 5 Things to Consider When Migrating EV to Office 365

TAKE A STEP BACK

Have you considered all the dependencies and how you will handle those in your project?

01

BRACE FOR IMPACT...

Are your legacy environments able to handle the migration load?

02

CHOOSE THE RIGHT ARCHITECTURE

Make sure you review the three different generations of architectural models, before you decide which vendor is best for you.

03

ALWAYS DO A PROOF OF CONCEPT!

You should make sure that the solution you pick works in your environment, with your requirements and data. That's why we always recommend you do a POC!

04

PREPARE FOR THE UNEXPECTED

Make sure that whichever vendor you choose takes a flexible, agile approach to your project and can adapt to changes that might occur.
